 e.g. Reduced chronic disease
- Improved policy

 e.g. Increased awareness
 among policymakers;
 Increased policies that
 promote/support health
 communities
- Improved service system

 e.g. Increased identification of high-risk family situations
 early for prevention activities
- ◆ Improved public norms and will e.g. Increased empowerment of people/communities to do their own problem solving
- Improved resources and funding e.g. Improved resources and services

- **GOALS**
- Improved individual and family life course
- Improved safety and health of communities

→

¹ Italicized outcomes are those prioritized at the public health nursing directors meeting on November 9, 2005, and are provided as examples of the broader outcome categories. Many other outcomes have been identified and are reflected in the public health services for children and families outcome maps.
